

## Week - 06 - Graphics\Lecture\_11\_code\_1.py

```
1  '''
2  We learn how to use a simple graphics library in this code
3  the library we use is graphics.py, which is a simplification
4  on top of tkinter. It is provided by our course book
5  '''
6
7  from graphics import *      # not a good way to import everything from a library
8
9  my_win = GraphWin("Graphics Testing", 600, 400)
10
11  # How to draw a point
12  p1 = Point(100, 100)
13  p1.setFill('red')
14  p1.draw(my_win)      # do not forget to actually draw on your window
15
16
17  # Draw a line
18  line_1 = Line(Point(10,390), Point(400, 390))
19  line_1.setFill('green')
20  line_1.draw(my_win)
21
22  # Draw a circle
23  circle_center = Point(20, 20)
24  radius = 10
25
26  # use a circle to represent a bomb
27  bomb = Circle(circle_center, radius)
28  bomb.setFill('blue')
29  bomb.draw(my_win)
30
31  # move the circle (bomb) on window
32  for i in range(100):
33      bomb.move(i,1)
34      time.sleep(0.1)
35
36
37  # keep the window on screen by let it wait for mouse click
38  mouse_location = my_win.getMouse()
39  print(mouse_location)
40
41
42
```
